Windows Roofline & Conservatories Ltd

**Fascias and Soffits**  
from Progress

# Welcome to Progress...

Progress Windows is dedicated to the improvement of your home and pleased to offer the most complete maintenance-free range of roofline and cladding products available to homeowners.

Each product in the Progress range has been specially designed to work together in harmony, to provide stunning looks and superior performance. The leaflet shows the roofline and cladding options available, from colours of fascias, to different types of gutters. It's impossible to cover every aspect of roofline, but having read the following pages, we are sure you will feel confident of making informed decision.

## Protect your home

Maintaining your existing woodwork is not only time consuming, it costs money too. Gone are the days where ladders can be used to paint your rooflines due to health and safety requirements.

Licensed access equipment (scaffolding etc) to prevent liability falling back on a homeowner in the event of an accident.

## What we do

- Complete removal of all timber products and replacement of any rotten timber if required before fitting of the new roofline.
- Move tiles back to access old and rotten sarking felt and replaced with rigid eaves guard.
- Install your 22mm fascia boards and soffits and raingoods completely.

## The choice is yours...

Renewing your old roofline or cladding with maintenance-free uPVC gives our property a deserved face lift and rejuvenates its overall look.

### Colour options

Speak to a representative about any colour options you may require.

### Cladding

Speak to a representative about any cladding you may require.

### Tudor boards

Speak to a representative about any tudor boards you may require.

## Guarantee

Once your installation is completed you have peace of mind knowing that all work is **guaranteed for 10 years!**

*Quality Guaranteed...  
If you're not happy, you don't pay!*
